Visualising

1 Jordan ran her fingers through her blonde hair. The locks that used to lie on her head were now scattered on the cement floor and down the back of the black cape she was wearing. As the hairstylist turned her around, she closed her eyes. She opened them a pinch and her face grew bright with excitement! She loved her new short cut with bangs barely covering her forehead.

2 The snake slithered in the long, green grass. It neared the edge of the water but retreated when a small boy flew by, tennis shoes pounding hard against the rocks surrounding the pond. The snake waited for the boy to pass and slithered again onto the rocks near the water. He lay basking in the sun until a group of children startled him with their screams from the playground slide.

3 David and Falrok were paired up to complete the chemistry science experiment. They were both a bit mischievous and mixed together the blue chemical and the red chemical, thinking a fun fizzy purple color would result. Boy, were they wrong! Instead of a fun purple fizz, they ended up with purple slime covering their table and papers and a very displeased teacher.

4 Jackie was up at bat next. She remembered what her dad had told her: "picture yourself hitting the ball, and you can do it!" So, she did. She pictured herself on the diamond, red and white ball moving toward her in slow motion, and the swift movement of her elbow guiding the bat to the ball. Suddenly, she realized it wasn't just a visualization! She had hit the ball and it was time to take off running!
